DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-20, 26-35, 36-45, 51 and 52 drawn to operator interface classified in class 345, subclass 762.
 - II. Claims 21-25, 46-50, and 53 drawn to operator interface with relation to help presentation classified in class 345, subclass 745.
2. The inventions are distinct each from the other because of the following reasons: Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I is an apparatus for highlighting recently used items in an interface. In the instant case, invention II is an apparatus for highlighting links of interest in web document.
3. Because the inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, and because the search required for Group I is not required for Group II restriction for examination purposes is indicated is proper.
4. During a telephone message with Applicants' Attorney, Duke W. Yee, on May 5, 2004 no elections were made.
5. Applicant is reminded that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently name inventors is no longer an inventor of at least once claim remaining in

Art Unit: 2173

the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
